

ST Solutions

Hello! We are Computer Solutions, a company involved in supporting the fantastic Atari ST computer. The ST represents state of the art technology at a very reasonable price. We applaud the efforts of Atari for doing so! Atari has big plans for this computer and it receives tremendous support by both commercial companies and users groups throughout the world. We also have developed software products of our own and have gathered some of the best public domain for the ST that there is to be found. Public domain is a fantastic way to get great software for almost nothing. Public domain differs from commercial software in that it is free to redistribute to others and carries no copyrights. These programs are developed by government grants, software authors who don't care to go through normal marketing channels and by companies that fail and donate their works to the public domain. In some cases the author asks for a contribution if you enjoy the program and it works well for you. This is a voluntary offering and directly between the user and the author. We have 118 of these disks listed within and more coming.

We are sure you will find many exciting programs in our listings, we ship all orders in 48 hours from the time we receive them. Personal checks are welcome with no wait. To insure your confidence we offer an exchange warranty (explained in the right column) and a lifetime media replacement service. Try a few, were sure you will be delighted. Most diskettes are 85% to 100% full giving you many many programs for a very low price!

We sincerely thank you for your interest and hope you enjoy reading our flyer. Thanks for your support!

Yours Truly,

David Wood
President

2:00 PM - 6 PM Thursday

Rent or Buy the complete diskette
public domain libraries
and SAVE \$\$\$!

You can buy all of our diskettes as a library for a remarkable \$199.95 postpaid for the ST1 to ST55 library or \$225.95 for the STGA01 to STBF06 library (\$399.95 for both) furnished to you on quality diskettes ready to load and go! This comes down to a less than \$4 a diskette! You can also rent the library for 10 days, copy the diskettes and return them for \$89.95 postpaid for the ST1 to ST55 library or \$99.95 for the STGA01 to STBF06 library (\$169.95 for both). On rentals you have 10 days from receipt to copy these diskettes and return them to us in good shape, there is a 3 day grace period for return transit time. There is a \$10/day late charge. To rent, send us a check for the rent amount plus the required deposit (\$100 for either library or \$200 for both libraries) when you return them your deposit will be refunded. On Visa or MasterCard orders you will be charged for only the rent amount. If you rent the library and decide to keep them, that's fine, let us know and we will charge you the difference. This is a new method for us and with your cooperation it will provide an even cheaper method for getting software than ever before!

Try our Super Variety Disk!

Try our super variety disk with lots of good programs. We are sure you will enjoy this one! Only \$6.95 postpaid! Features programs such as:

FINANCE.BAS .. To load this program you must first load ST.BASIC, once BASIC is loaded simply type in RUN "FINANCE" to cause the program to run. This program contains a large number of financial programs (18 in all). You simply choose the number of the function you wish to run answer the questions and let the program compute and display the results.

BACKGAM1.BAS .. To load this program you must first load ST.BASIC, once BASIC is loaded simply type in RUN "BACKGAM1" to cause the program to run. This is a full color Backgammon program with nice features.

MASTER.BAS .. To load this program you must first switch to the low resolution mode with the Set Preferences option. To load this program you must first load ST.BASIC, once BASIC is loaded simply type in RUN "MASTER" to cause the program to run. Instructions are displayed on the screen. This program uses the colors nicely and is a good strategy game.

BOUNCE2 .. For those of you who have seen the impressive Amiga bouncing ball, this is the ST's answer. Animation, sound and graphics are all displayed.

SUPERST .. Color Galore! A beautiful display of the ST's color generating random kaleidoscope patterns. Simply select the diskette to open the directory and select the icon or filename.

PIANO .. Your keyboard becomes a piano keyboard as you play your favorite tunes. This program is nicely done and shows off the sound capabilities of your ST. Simply select the icon for Piano to run.

MEGAROIDS .. A GREAT version of the popular Asteroids arcade game. Written in C it is fast and fun! Full featured and excellent play. The commented 'C' source code is available directly from the author at very modest cost (Info in this in the program). The instructions are contained on screen. Select the icon for the program to run.

BLKOUT .. This nifty program simply makes your screen go dark and stay dark until you press any key. Say you going to go away for a couple of hours and then come back. Just run this program to black out your screen (so you don't burn an image into it) and when you come back press a key and your right back where you were. Very handy !!!

NIGHT .. A fun and exciting game with lots of color and sound. To get full instructions just click on the NIGHT.DOC file and read the description. Very nice program. To run just click on the program NIGHT.PRG. Runs in low res mode only!

Brand New Diskettes !

NOTE: IF YOU ORDER DISK WITH PICTURES
(.PIC, TNY, PI2 etc) YOU ALSO NEED
DISK STUT13. IF YOU ORDER DISK THAT
HAVE FILES ENDING WITH .ARC YOU NEED
DISK STUT09.

as low as \$1.60 each when rented
as low as \$3.75 each when bought!
+ FREE SHIPPING!!

ST10

=> A disk full of pictures in the DEGAS, NEOCHROME & MAC-PAINT formats. Comes with slideshow program to display the pictures.

ST01 => Forth Language, public domain Forth 83 with example files and utilities.

ST02 => 68000 Assembler. Create your files with the powerful EMACS editor, also on this disk. Includes example programs.

ST03 => Pictures & Music. Pictures in NEOCHROME format and music to use with Music Studio.

ST04 => A handy collection of desktop accessories, including a very powerful scientific calculator, calendar, a puzzle, ram disk, file editor and more.

ST05 => A super terminal package allows you to communicate with CompuServe, our bulletin board, or hundreds of others. Full upload & download capabilities. Easy to use!

ST06 => Games I. A half dozen good games ready to play. Very nice!

ST07 => Financial Disk. Many financial functions including printing amortization, interest calculations. There are over 30 functions in all! A SUPER VALUE

ST08 => STwSlideshow, Full TIw59 Programmable Calculator, and some Utilities.

ST09 => Backgammon game, RAMdisk, Yahtzee, Mastermind & Picture file Utilities.

ST11 => Deluxe Music Piano, NEO Picture Editor, Disk Format Utilities (allows more info to be stored on each disk!), CPP a command processor that emulates the type of commands that an IBM-PC uses from a command line and even some more.

ST12 => Disk Cataloging system. Allows you to catalog your diskettes into a data file, then search, sort, print the contents and more. Very Handy!

ST13 => Slideshow - 26 different graphics pictures with music to run as a demonstration. Good to show off your ST.

ST14 => LOGO programs, 30 LOGO programs to run and study, a real help in learning LOGO.

ST15 => C files, a number of C programs including source code to study and learn. Learn C!

ST16 => XLISP, learn this exciting language of artificial Intelligence. Includes language, documentation files, and 11 sample programs.

ST17 => Picture Slideshow with a number of girly pictures. Tastefully done but fun!

ST18 => dbMAN Disk. Several tutorials and techniques for the great dbMAN relational data base language (virtually the equivalent of dBASE III for the ST).

ST19 => Celestial Caesars - A combination of RISK & STRATEGO. Song files for Music Studio and a picture editor.

- ST20 => TINY w a program to compress picture files. A text graphics adventure, Megaroids and more.
- ST21 => STwSchool. These are text files of the contents of Tim Oren's ST PRO GEM column covering many topics on the ST. Also included are the associated programs and source code.
- ST22 => NEO2 (latest version of NeoChrome V0.6A), several utilities and hints for playing some of the InfoCom adventures and more.
- ST23 => Hard Disk Utilities. A super backup routine for backing up hard disks to multiple floppies, a ChkDsk program to check the integrity of your hard disk and directories, and several others. A must have for hard disk owners.
- ST24 => Modula & Pascal utilities, document files and sample programs. Helpful info on these languages.
- ST25 => Bulk Erase w a software eraser, Printer drivers for various printers and a super hi-res graphics demo among others.
- ST26 => Super Utilities. A routine to format floppies to get for extra high density (399k or 809k), it's like getting free diskettes. Binary file compare. File tester and many more.
- ST27 => Neo Pictures 2. More great pictures to display and use with NeoChrome.
- ST28 => Neo Pictures 3. NeoChrome pictures volume 3.
- ST29 => Neo Pictures 4. NeoChrome pictures volume 4.
- ST30 => Neo Pictures 5. NeoChrome pictures volume 5.
- ST31 => Squeeze and Archive. These programs allow you to squeeze and unsqueeze your programs to save space and transfer time. Archive allows you group files to gather in a space saving library. These programs are a must, if you use bulletin boards and electronic databases.
- ST32 => BATTLESHIP game, CHECKERS (hard to beat), A program that remembers date and time on resets, memory tester & others.
- ST33 => An artificial intelligence demo, program for making templates for ST Writer, ST BASIC and others. More.
- ST34 => A complete adventure development system. Allows you to write your own full text adventures, just like the pros. Comes with complete documentation and sample programs.
- ST35 => ForthMACS. This is a great system. One of the most complete and usable versions of FORTH we've seen. Designed on the ST for the ST! Includes editor and brief documentation. You can even register with the author for complete source code.
- ST36 => A super-deluxe slideshow with beautiful music accompanying each slide. Very nice demo for showing off your ST!
- ST37 => A disk full of info on OSS Pascal and a number of good utilities with documentation on disk. Also some nice utilities, a program to verify each disk write as it occurs, a program to help recover files that were accidentally deleted.

- ST37 => A disk full of info on OSS Pascal and a number of good utilities with documentation on disk. Also some nice utilities, a program to verify each disk write as it occurs, a program to help recover files that were accidentally deleted.
- ST38 STWriter w A deluxe quality Word with lots of nice features and very fast operation. Most things happen in memory so it's very quick. We prefer this one, to many of the commercial products. Comes not only with documentation, but even a full tutorial. Excellent!
- ST39 Tom Hudson's Picture files converted to NEO format with built in slideshow program.
- ST40 EasyDraw Drawing Program. This disk is put together by Miw Graph and is just like their commercial version except the save and print are disabled. Dozens of features, comes with extensive instructions. VERY, VERY NICE!
- ST41 Neo Pictures 6 w About a dozen more beautiful NeoChrome Pictures with a built in slideshow.
- ST42 Animated Demos w This interesting disk has a number of demo's of animation, some including source code. Over a dozen animation on disk.
- ST43 DEGAS Pictures w A picture full of nice pictures done with DEGAS. Comes with a selfw running slideshow program.
- ST44 Fractuals, Dragon Maze other games. Source code in BASIC, Pascal and Modulaw2
- ST45 DEMOS w Bird, Boink, Cube, Hex, Kaliedoscope, Lowcircle, Piano, Piechart, Pieman, Quix, Sound, String, Surface and Zarath.
- ST46 Doodle Drawing Program, VIP Professional demo, Round Program, Print program, Sinewave Color, Line drawing demo.
- ST47 LooneyToons Cartoons w Bugs Bunny, Coyote, Daffy Duck, Martian, Tweety Bird and more all in a nice slideshow.
- ST48 Monochrome disk w Games, Slides, demos and more for those with a monochrome monitor.
- ST49 DEGAS utility disk w 14 fonts, 12 printer drivers, Neochrome conversions to Koala and Degas.
- ST50 More Games w BlackJack, MadLib, Mazemaker, MyLife, TwoGame, RipCord, Score 4, Sundog hints, Bomber, Scratch, Switchbox and Biorythm.
- ST51 Utilities by FASTER w Calc, Changel, Clock, Command, Convert, Copydisk, CopyDisk2, Deg2NEO, dump, Epson2, Koalawtow Degas, Make512, Make1MEG, Neow towDegas, OScall, Print, ReadPIC, SECTORwED, Squeeze, Unsqueeze, VDI Show, Verify and others.
- ST52 InfoCom Sample Demos. Try your hand at the famous InfoCom adventures! ZorkI, PlanetFall, Infidel and Witness. Shortened but playable versions.
- ST53 Music Studio Song Files w 50 song files to be used with Activisions Great Music Studio Program.
- ST54 Super Slideshow w 51 pictures in all! Lots and lots to watch. Requires a doublew sided drive to use. This is the biggest slideshow we've ever seen!
- ST55 VIP Professional Demo. VIP is the premier spreadsheet. It is completely Lotus 1w2w3 compatible, including Lotus macros. This demo is just like the commercial product with some of the features disabled. TRY IT!

There are thousands of scores boards out there for the ST, as well as Compuserve, The Source, Delphi and many others, with literally millions of bytes of information (billions would probably not be an exaggeration). To use these, all you need is a modem, the appropriate cable, and the correct software. We have put all of these together at one very low price. The modem is a 300/1200 baud modem with auto answer/auto dial features, Hayes compatibility, status lights and a pleasing eggshell white color and a two year warranty. The modem is the external type so you can use it with other computers you may have also. We use 3 of these modems ourselves, including one used on a bulletin board system. The cable is the correct one for the ST and the software supports auto dialing with a built in phone directory, upload, download, auto chop on binary files and about any other feature you might want is there also. The best price we have seen for a package like ours is \$175! CATNUM: STMODEM, price \$119.95 postpaid! HURRY! OUR PRICE HAS INCREASED ON THESE, THE NEXT TIME WE OFFER THIS PACKAGE IT WILL BE HIGHER! Also included is a free sign up kit for Compuserve (a \$50 value with \$15 time credit!). We also offer the Avatex 1200HC package which is exactly like the 1200 we offer for \$119.95 but also includes

programable S Registers and a speaker, this makes it 100% Hayes compatible for applications that require this. The price for this package includes the 1200HC modem, cable, software and free Compuserve sign up kit for only \$145.00 postpaid. CATNUM: STMODEMH. We have sold hundreds of these fine packages, beat the price increase!

THIS MODEM WORKS WITH ANY Computer

- Direct Connect
- External AC Adapter
- 8 LED Status Indicators
- Auto Answer and Dial
- Hayes Compatible AT Command Set
- Bell 103/212A Compatible
- Tone or Pulse Dialing
- Telephone Connection Jack
- Standard DB25RS 232-C Connector
- FCC Approved

FREE! Communication Software & Compuserve Access Time with each MODEM.
